

# IECEx Certificate of Conformity

### INTERNATIONAL ELECTROTECHNICAL COMMISSION IEC Certification Scheme for Explosive Atmospheres

for rules and details of the IECEx Scheme visit www.iecex.com

Certificate No.:	IECEx PRE 18.0076X		Issue No: 0	Certificate history:
Status:	Current			Issue No. 0 (2018-11-19)
Date of Issue:	2018-11-19		Page 1 of 3	
Applicant:	<b>PMV Automation AB</b> Korta gatan 9 SE-171 54 Solna <b>Sweden</b>			
Equipment: <i>Optional accessory:</i>	Ultraswitch DS/DM			
Type of Protection:	Ex d version and Ex ia version of product			
Marking:	For Ex d version of product Ex db IIC T5 Gb, $-40^{\circ}C \le Ta \le 85^{\circ}C$ Ex tb IIIC T94°C Db IP66, $-30^{\circ}C \le Ta \le +70^{\circ}C$ For Ex ia version of product Ex ia IIC T4 Ga Ex ia IIIC T135°C Da IP66 (See full specs in Annex to Certificate)			
Approved for issue or Certification Body:	n behalf of the IECEx	Asle Kaastad		
Position:		Certification manager		
Signature: (for printed version)				
Date:				
2. This certificate is ne	schedule may only be reproduced in full. ot transferable and remains the property of the issu henticity of this certificate may be verified by visitir		ıbsite.

# IECEx Certificate of Conformity

Certificate No:	IECEx PRE 18.0076X	Issue No: 0
Date of Issue:	2018-11-19	Page 2 of 3
Manufacturer:	PMV Automation AB Korta gatan 9 SE-171 54 Solna Sweden	

Additional Manufacturing location(s):

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

#### STANDARDS:

The apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

IEC 60079-0 : 2011 Edition:6.0	Explosive atmospheres - Part 0: General requirements
IEC 60079-1 : 2014-06 Edition:7.0	Explosive atmospheres - Part 1: Equipment protection by flameproof enclosures "d"
IEC 60079-11 : 2011 Edition:6.0	Explosive atmospheres - Part 11: Equipment protection by intrinsic safety "i"
IEC 60079-31 : 2013 Edition:2	Explosive atmospheres - Part 31: Equipment dust ignition protection by enclosure "t"

This Certificate does not indicate compliance with electrical safety and performance requirements other than those expressly included in the

Standards listed above.

#### **TEST & ASSESSMENT REPORTS:**

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in

Test Report:

NO/PRE/ExTR18.0051/00

Quality Assessment Report:

NO/NEM/QAR08.0008/09

# IECEx Certificate of Conformity

Certificate No:	IECEx PRE 18.0076X		Issue No: 0
Date of Issue:	2018-11-19		Page 3 of 3
		Schedule	

#### EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

PMV DS/DM limit switch enclosures provide local and remote position indication for automated valves. They may also be used as a junction box for direct installation of solenoid valves. The enclosure are made of Aluminium or Stainless steel material, with two cable entries of <sup>3</sup>/<sub>4</sub>" NPT or M25 X 1.5 and provided with third cable entry as an optional without any opening. The aluminium enclosure has order code of B, C, W and stainless steel enclosure with S. NBR & Viton are the two gaskets used for the ingress protection. Connecting cables must be rated for ambient temperature above 161°C. Certified Ex glands shall be used accordingly for Ex d and Ex t protection type

Internal parts are wiring terminals and the switches, up to four switches may be installed. No other active electronics exist in EUT. The Ex ia version of EUT is similarly built-up using the Ex d enclosure and having terminals and switches as internal parts. Each switch is used as a separated circuit. The safety input parameters are therefore dedicated for each single switch.

A wide range of switches could be ordered, which leads to a larger range of EUT's version. The order code of EUT and electrical safety parameters are described in Annex to IECEx certificate.

#### SPECIFIC CONDITIONS OF USE: YES as shown below:

- The flamepath gaps are less than those given in the standards and shall not be enlarged. For the repair of flameproof joints, the manufacturer shall be consulted.
- Potential risk of electrostatic discharge. See instructions for guidance to minimize risk of electrostatic discharge
- Minimum cable size shall be 1mm<sup>2</sup> or 17 AWG for switches rated higher than 3A and minimum cable size shall be 0.8mm<sup>2</sup> or 18 AWG for switches rated at 3A or lower.
